

OBJECTIVES

Second-year Computer Science Engineering student seeking a technical internship to apply programming, data analysis, and artificial intelligence concepts through real-world problem-solving projects.

ACADEMIC PROJECT

AI-Based Soil Health & Crop Recommendation System

Developed a machine learning system to recommend suitable crops based on soil nutrients (N, P, K), pH, temperature, humidity, and rainfall

- Performed data preprocessing and exploratory data analysis using Python
 - Trained and evaluated models such as Decision Tree and KNN for crop prediction
 - Visualized prediction results and crop suitability using Matplotlib
 - Achieved high model accuracy through feature selection and model tuning
-

Real Estate Management Web Application

- Built a full-stack real estate platform with a public website and secure admin dashboard
 - Developed responsive frontend using React (Vite) and implemented client-side routing
 - Created RESTful APIs using Node.js and Express for managing projects and gallery data
 - Integrated Supabase (PostgreSQL) for database and authentication
 - Implemented JWT-based authentication, protected routes, and role-based access control
-

SKILLS:

- Python, C, C++
- HTML, CSS, JavaScript
- React.js (Vite), Node.js, Express.js
- REST API development
- Supabase (PostgreSQL)
- JWT-based authentication & authorization
- Machine Learning fundamentals
- Data Analysis & Data Visualization
- Pandas, NumPy, Matplotlib, Scikit-learn
- Git, GitHub, Jupyter Notebook

EDUCATION

Bachelor of Technology – Computer Science & Engineering
Pimpri Chinchwad College of Engineering, Pune
2024 – 2028
Higher Secondary Certificate (HSC – 12th, Maharashtra State Board)
Maharashtra State Board of Secondary & Higher Secondary Education | 82.00%
Secondary School Certificate (SSC – 10th, Maharashtra State Board)
Maharashtra State Board of Secondary & Higher Secondary Education | 95.40%
